 <p>mindstream</p> <p>Introductory French</p> <p>Tricia Diamond</p>	<p>Introductory French</p> <p>A comprehensive introduction to the French language and to the cultures of the French speaking world. In French I our goals are to discover basic grammar concepts and structures, to explore new sounds and words, and practice speaking, listening, writing and reading on a basic but functional way. The best way to be successful when learning a language is with daily practice, so students will be encouraged to speak French in the classroom from day 1! We begin mostly in English and after every session, we speak more and more French.</p>	<p>8-Sessions</p> <p>Every Monday and Wednesday @ 10:00 am (PST)</p> <p>Next Sessions start on Monday, April 20</p>	<p>Click to Webinar Registration</p> <p>https://bit.ly/iutfrench</p>

They all derive from Vulgar Latin, the vernacular variety spoken by the common people of the Roman Empire. That means these languages share a whole lot of cognates, or words that are spelled and sound the same and that have the same meaning across more than one language.</p> <p>These sessions will get you up and going with basic Spanish. Savannah is upbeat and interactive. Each student should attend each session.</p>	<p>8-Sessions</p> <p>Every Monday and Wednesday @ 2:00 pm (PST)</p> <p>Next Sessions start on Monday, April 13</p>	<p>Click to Webinar Registration:</p> <p>https://bit.ly/iutspanish</p>

Algebra Basic and Advanced

Miles Jackson

Algebra is a branch of mathematics that deals with symbols and following rules that helped in maneuvering those symbols. In elementary algebra, these symbols represent quantities without a fixed value more commonly known as variables. Simply putting it, algebra is all about finding the undefined variables into equations and finally solving them. It is that branch of mathematics that substitutes letters for numbers, and it is an algebraic equation that represents a scale on both ends on what is done. Algebra constitutes complex numbers, real numbers, matrices, vectors, and various other forms of mathematical representations. Algebra is an integral part of every student's mathematics curriculum in high school, and one that gives most exam jitters in school. However, if it is not a part of our curriculum, many students might not get the heights in their careers they always aspired
